To facilitate ease of handling, please place all of your fleece into a wool pack. Ensure all bags, bales are clearly marked

National Presidents Letter

2 April 2025

Dear Members,

It is with great sadness that we inform you Val Ross, a stalwart of the mohair industry passed away on the 30 March 2025. Our sincere condolences to Brian, Rowan and the family. Brian and Val together have made a great contribution to the mohair industry.

The upcoming Goat Fibre Field day on Friday the 11 April 2025 is featured in this edition. It was rescheduled from last year to provide more local lead up. Next Gen Ag and the Victorian Division are at Seymour Alternative Farming Expo this weekend promoting the event and it is featured in the Shepperton Newspaper. We also put out a call to action to list animals for sale. We all say we have animals for sale but until you go through and work out your herd structure you don't know who you can sell. I think this is an important step to help activate the strategy of growing the industry. We need age, sex, how many and what price range. So far we have 5 genuine listings.

International news. The demand for bucks in South Africa this year has been very strong. We have included the auction results to show you that these animals are highly valued in South Africa, there is a good base of does being mated this year and it gives you an indicator of what we should be charging for quality bucks.

Field days and the role of MAL. We need to take the lead on participating and running a site at the key field days. I have heard good feedback from the recent South East Field Days at Lucindale in South Australia which involved Georgia B, Thomas Cook and Bec Kuss.

A reminder to renew your MAL membership or join up.

I had the pleasure of judging the National Angora Trophy Show this year. I wanted to thank the organisers, helpers, exhibitors and schools for making it a great show.

Sydney Royal Easter Show have announced Mr. Jason Bannowsky, a distinguished international judge from Texas, USA, will be officiating the Angora Goat and Mohair Section.

Best wishes for the joining season. The bucks are going nuts at our farm, it is a busy time of the year.

Yours sincerely,

Nick Gorrie

AgriFutures Goat Fibre Program – On-Farm Field Day

The AgriFutures Goat Fibre Program is excited to announce its first on-farm field day, set to take place on Friday, April 11, 2025, near Violet Town, VIC. This event promises to be a day of discovery and learning for everyone, from industry veterans to newcomers alike.

The field day is part of Future Fibre Farming – the AgriFutures goat fibre extension and industry development program that aims to encourage new producers to the industry and transform the hobbyist niche into a mainstream commercial animal fibre. Led by neXtgen Agri, the project team have been travelling far and wide to build interest at other field days – Goat Fest in TAS, the National Angora Goat Trophy and Sale in NSW and Woolarama in WA and are excited to head to VIC for the Seymour Alternative Farming Expo and the Goat Fibre Field Day in Violet Town.

The field day will kick off at 11am and run until 3pm, offering a packed schedule of activities and presentations. Attendees will have the opportunity to engage with experts in the field and participate in panel discussions. The event aims to shed light on the benefits and intricacies of goat fibre farming, providing valuable insights and practical knowledge to all participants.

Georgia Buchholz from neXtgen Agri will start the day with a talk on “The Goat Fibre Gateway,” providing an overview of the industry and its potential. Dr. Mark Ferguson will follow with a session on “Selecting the Right Bucks and Does,” offering tips on choosing the best animals for fibre production. Dr. Berwyn Squire will then discuss common diseases in goats, a crucial topic for maintaining a healthy herd.

Lunch will be provided, giving attendees a chance to mingle and network with fellow goat fibre enthusiasts. During this time, there will also be a shearing demonstration, showcasing the process of harvesting goat fibre. The afternoon sessions will feature Dr. Bruce McGregor and Dr. Susan Robertson, who will cover topics such as integrating angoras and other practical aspects of goat fibre farming.

In addition to the presentations and demonstrations, there will be a range of resources available for attendees. The AgriFutures Goat Fibre Program team will be on hand to provide information and answer questions about their work. There will also be take home materials, including a range of factsheets covering all aspects of goat fibre farming.

The field day is free to attend, but registration is required. Interested individuals are encouraged to register their interest by emailing goatfibre@agrifutures.com.au as soon as possible.

The AgriFutures Goat Fibre Program is committed to supporting the growth and development of the goat fibre industry in Australia. This field day is just one of the many initiatives they have planned to help farmers improve their practices and achieve greater success. By bringing together experts and enthusiasts from across the industry, the event aims to create a platform for knowledge sharing and innovation.

The team looks forward to welcoming you to this exciting event and helping you discover the potential of goat fibre farming.

2025 Tasmania Annual Angora Show

Judges Report

It was great to be back in Tasmania for their Premier Show held at Deloraine on the 16th of February, it has been a number of years since I have previously judged there.

There was a very good lineup of good quality animals and fleeces. There was not a huge number within the show, but the animals that were presented were of quality, showing that the quality of mohair both on the animals and in the fleece, classes were a tribute to the breeders.

It is not easy for the small number of breeders within the state; to be able to continue to improve, it is difficult without easy access to genetics available on the mainland.

I must congratulate the exhibitors on their animals and fleeces presented.

It was a privilege to judge at the show and I thank the committee for their invitation.

John Hoornweg (Judge)

ANGORA RAM SALES
 2024 - 2025

During this ram selling season, a total of 498 Angora Rams were sold across six sales, achieving an average price of R11 005 per ram.

Here's the breakdown of the results and averages across all six sales:

| Auction | Rams | Highest Price | Averages | Best Averages | SP Averages | Puck Averages |
|-------------------------------------|------|---------------|----------|---------------|-------------|---------------|
| National Angora Ram Sale | 88 | R10 000 | R8 794 | R88 500 | R27 625 | R9 680 |
| Commercial East Angora Ram Sale | 50 | R60 000 | R10 330 | R25 200 | R10 600 | R7 800 |
| Van Heerde & Goud (Angora Ram Sale) | 104 | R60 000 | R10 589 | R28 400 | R27 500 | R12 700 |
| Van Heerde & Goud (Angora Ram Sale) | 74 | R30 000 | R11 000 | R24 800 | R18 200 | R9 600 |
| Heritage Angora Annual Ram Sale | 80 | R60 000 | R10 400 | R25 800 | R19 000 | R8 800 |
| Karoo Angora Ram Sale | 900 | R40 000 | R10 260 | R20 500 | R11 700 | R8 500 |

We extend our gratitude to all breeders and buyers for their loyalty and support during the season. Congratulations on the exceptional quality and results achieved, may your rams bring you continued success.

HF

Red Meat Council Media Release

Thursday 3 April 2025

Australian red meat industry disappointed with US tariff decision

The Red Meat Advisory Council (RMAC) and its members are disappointed in the United States' decision to impose tariffs on Australian red meat exports destined for the US.

RMAC Chair, Mr John McKillop, said the decision to impose a 10% tariff on goods imported to the US failed to recognise that Australian red meat contributes to stable food supplies and prices in the United States.

"While Australian meat exports will shortly be subjected to a 10% tariff, there is no ban on Australian red meat and our trade with the US will continue.

"However, it remains a disappointing decision from the US, in stark contrast to our 20-year partnership under the Australia-United States Free Trade Agreement (AUSFTA)," Mr McKillop said.

"Last year, 2024, was a record year for Australian red meat exports, driven by strong global demand. Australian producers can be assured that we operate in a strong global trading environment with high demand for our red meat from over 100 markets.

"It's critical to note just how diversified Australia is with our red meat exports. Other major markets include Greater China, Japan and Korea, worth A\$3.9B, A\$2.6B and A\$2.5B respectively. The Middle East / North Africa Market is worth A\$2B and offers demand growth opportunities."

Mr McKillop said the Australian red meat industry, in partnership with the Australian government, has worked to alleviate economic trade barriers, including tariffs, via the negotiation of free trade agreements over a number of years. As a result, 91% of beef, 74% of sheepmeat and 89% of goatmeat exports traded globally are covered under existing FTAs, which remain effective.

"The US was Australia's largest red meat export market in 2024, worth A\$6.07B, almost one third of total global exports," Mr McKillop said. "The US will continue to be a key market despite these tariffs.

Mr McKillop said RMAC would work with its members and industry service providers including Meat & Livestock Australia to support the industry to deal with changes to the trading arrangement with the US.

"In addition to forming an industry taskforce to respond, we are also working very closely with the Australian Government to restore free trade between Australia and the United States - as underpinned by the AUSFTA," he said.

"As an industry, we will continue to leverage existing industry initiatives that build demand for Australian red meat around the world. We will also be working as an industry to ensure producers and the entire supply chain are informed about what this change means for them in order to make the best possible business decisions."

Mr McKillop said the decision would impact US consumers.

"Imports serve as a shock absorber during cyclical supply fluctuations when US meat production is down. This is the case at the moment with their overall herd at 70-year lows due to drought. Cow slaughter in the US was down 23% in 2024 and expected to decline near 10% in 2025," Mr McKillop said. "This means that imports are critical for the US to supply their domestic consumers.

“For beef, a major component of Australia’s exports to the US supports a strong appetite for hamburgers. Without Australian lean beef blended with local fatty trim, the US would need to use higher value cuts in their burgers and miss out on valuable export opportunities. This in turn optimises value for US ranchers.”

“Australian beef is in an estimated 6 billion hamburgers consumed each year in the US and this tariff will cost the US consumer an additional US\$180m per year.

“The total impact to the American consumer as a result of tariffs on Australian red meat will be AU\$600m.”

According to recent economic analysis from Steiner Consulting Group, in 2024, Australian beef imports supported \$377 million in added value for US cattle producers, equal to approximately A\$15 per head.

“For industries like lamb and goat, Australian product ensures stability of supply and services local demand that cannot be met domestically,” he said.

“In addition, imported lamb and goatmeat help sustain, or even expand, consumer demand for these products, ensuring that American producers will stand to gain as more consumers become interested in lamb and goat.”

Domestic lamb production increased by 3% in the US in 2024, and further growth is expected in 2025 and 2026 due to rising lamb inventories. Per capita lamb consumption in 2024 was estimated at 671 grams per person, a 57% increase from 2011 levels.

In 2024, Australia exported 394,716 tonnes of beef worth \$4.16 billion, 104,210 tonnes of sheepmeat worth \$1.35 billion and 22,559 tonnes of goatmeat worth \$188.5 million.

Alloura show

Full Qld show results and photos will be in the next edition. A teaser of some good photos from Alloura show and Joseph Keates. See below.

Jalepeno Cabrito Chops - Texas A&M Extension Bulletin

INGREDIENTS

- 4 shoulder chops, 1 inch thick, round bone or blade
- 1/2 cup jalapeno jelly or apricot jam
- 1 tsp salt
- 1/2 tsp ground pepper
- 1/4 cup fresh lemon juice
- 1/2 tsp ground cinnamon
- 1 tbsp prepared mustard
- 8 ounce can of crushed pineapple in pineapple juice

INSTRUCTIONS

Sprinkle the shoulder chops with a mixture of salt, pepper, and cinnamon. Combine the remaining ingredients in a small saucepan and bring to a boil. Stir well until jelly is completely melted. Remove from heat. Broil or grill chops 4 inches from heat source for about 8 to 10 minutes on each side until done. Baste with sauce last 5 minutes of cooking time.

Did you know?

- Goat meat is one of the most commonly eaten red meats in the world
- Goat meat has less fat than chicken
- Goat meat does not marble, thus, any fat on the carcass is easy to trim
- Goat fat has an excellent ratio of polyunsaturated to saturated fats
- Goat meat has a superb flavour, similar to beef and venison
